COMPANY ANNOUNCEMENT Thursday 10th July 2008

basis2 – TCEQ selects basis2 for Revenue Management

July 7, 2008 – Following up on the recent success of basis2 at the City of Philadelphia and selection of basis2 by South East Water, the Texas Commission of Environment Quality (TCEQ) has selected basis2 as its Revenue Management solution.

John Racanelli, Revenue Section Manager for the TCEQ said “Prior to soliciting a billing and accounts receivable system solution through a competitive procurement process, TCEQ performed an extensive business requirements analysis. basis2 was selected because it offers a range of configuration settings to address TCEQ's business requirements and demonstrates the flexibility to meet the organization's changing needs.”

The TCEQ is unique in many ways, in particular their billing and collections processes and historical account management. With some 165,000 accounts, 70,000 may be active at any one time. As a central agency for the Texas State government, there are also significant integration requirements.

Prophecy International has teamed with Applications Software Technology (AST) Corporation to implement the basis2 solution. AST Corporation is an Oracle Certified Advantage Partner with a 100% success rate on Oracle E-Business projects.

Said Peter Barzen, EVP of Prophecy International: “We're very pleased to be selected by the TCEQ and to further establish basis2 as a solution of choice. Our showcase success at the City of Philadelphia has generated significant interest and opportunity for basis2. TCEQ are to be commended for their selection.”

basis2 is a flexible; value based offering for the CIS and Revenue Management markets. The organic Oracle technology and applications platform helps reduce risk, overall costs and extends the basis2 capabilities.

About the TCEQ

The Texas Commission on Environmental Quality (TCEQ) is the environmental agency for the state. The TCEQ has approximately 2,900 employees, 16 regional offices, and a \$566 million operating budget for the 2008 fiscal year.

About basis2

Prophecy International, the authors and owners of basis2, have over 14 years experience with Utilities and Revenue Management applications. The BASIS suite is used by a number of leading organizations in Australia, Asia, the UK and the USA. It is function-rich and flexible, suited to both the commercial and public sector markets.

About AST Corporation

Applications Software Technology (AST) Corporation is an Oracle Certified Advantage Partner specializing in Oracle E-Business Suite implementations and upgrades. AST Corporation is a US based systems integration partner of Prophecy International for basis2 software implementations.
